WE BELIEVE

IF we provide low-income children, grades K-8, with comprehensive, out-of-school academic support, enrichment activities in a positive environment

THEN they will make academic and socio-emotional gains during the school year, and break the cycle of generational poverty.

OUTPUTS

110 Youth Served (Ages 6–13)

16 STEAM Curriculum-based Educational Field Trips

43 Visits to the Twitter NeighborNest

75% Enrichment STEAM Curriculum-based Activities

OUTCOMES

100% of students understand math better

100% of 3-5 graders learned things in the program that make them want to learn more

100% of 6-8 graders are better at getting their homework done

These results are based on the San Francisco Department of Children, Youth & Their Families (DCYF) Survey.

About
Catholic Charities Maureen & Craig Sullivan Youth Services provides programs for school-age youth, 5-12 years of age. As an academic enrichment based program, these services address educational deficiencies by providing activities that build proper developmental skills and promoting healthy growth.

Maureen & Craig Sullivan Youth Services provides out-of-school child-development and family support services that strengthen family and community bonds. The facility is equipped with indoor and outdoor space for safe, well supervised and age appropriate programming with emphasis on homework assistance, tutoring options, socio-emotional curriculum, nutrition, recreation, and STEAM centered activities.

Families are strengthened through Parent Support Activities, helping them to reach and maintain self-sufficiency.

Change Model

The Need
Families of school-age children in the South of Market area lack:

• Affordable, safe and positive out-of-school enrichment activities focused on science, technology, engineering, art and math (STEAM)

• Support for parents

Our Response

• A minimum of three hours a day of academic enrichment activities

• Use well-researched, STEAM-focused curriculum

• Qualified teachers

• Parent trainings on topics related to STEAM

Client Outcomes

• Improved educational, safe, and positive experience after school and during school breaks and summer

• Increased awareness and understanding of Math, Science, and Technology for both children and parents

Community Impact

• Schools benefit from students more academically prepared to succeed in school

• Society benefits from more STEAM professionals

• Community benefits from more families able to work
